

Project Manager

About Occlutech:

Occlutech is a renowned and innovative medical device manufacturer specializing in developing life-saving solutions for patients worldwide.

Position Overview:

As a Project Manager at Occlutech, you will play a pivotal role in managing strategic projects and contributing to the enhancement of our project and portfolio management processes.

Responsibilities:

- Lead and manage assigned strategic projects from initiation to completion, ensuring adherence to project scope, budget, and timelines.
- Collaborate with cross-functional teams to define project objectives, deliverables, and resource requirements.
- Develop and maintain comprehensive project plans, including work breakdown structures, schedules, and risk mitigation strategies.
- Monitor and track project progress, identify and address potential issues and bottlenecks, and communicate project updates to stakeholders.
- Foster effective communication and collaboration among team members, ensuring alignment and clarity on project objectives and priorities.
- Contribute to the continuous improvement of project and portfolio management processes within the PMO, identifying areas for enhancement and implementing best practices.
- Create and refine policies, procedures, and templates for the PMO, ensuring consistency and standardization in project management practices.

Requirements:

- Bachelor's degree in mechanical, biomedical, materials, chemical engineering or a relevant field.
- Previous experience in product development projects.
- PMP or other relevant project management certification is a plus.
- PMO experience is a plus.
- 3-10 years of work experience
